

BOWFLAG® PREMIUM Scoop

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for indoor or outdoor use.

DESCRIPTION

The Bowflag® Premium Scoop is an attention-grabbing flag display that doesn't require wind for visibility. This scoop-shaped print simply uses wind to enhance its unique shape. Constructed of aviation-grade fiberglass and steel poles, this flagpole comes in two sizes with heights reaching 14' and 18' tall. The custom print is finished with graphics that cover the pole sleeves in place of black poly-stretch header tape, providing maximum advertising space. Your client doesn't need any tools to assemble this flagpole. Use the included economy bag for traveling or the optional carrying case with handles and individual pockets to store the display. Your client's Bowflag® Premium Scoop is durable and versatile for use both indoors and outdoors to promote a department's free giveaway or to remind a community to vote on election day.
