

BOWFLAG® PREMIUM Shield

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for indoor or outdoor use.

DESCRIPTION

The Bowflag® Premium Shield is a unique flagpole that uses the wind to enhance its eye-catching appearance. It is constructed of aviation-grade fiberglass, aluminum, and steel poles that are available in three sizes with a maximum height of around 16'. The single-reverse or double-sided print comes in the shield shape and is finished with printed pole sleeves to increase advertising space. The hardware for this flagpole can be assembled without any tools and can be stored easily in the included economy bag or optional carrying case with handles and individual pockets for transport. The Bowflag® Premium is ideal for use outdoors for anything from advertising the grand opening of a new restaurant downtown to drawing attention to the new renovations a store has recently completed.
