

BOWFLAG® STREET BANNER

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for use indoors or outdoors.

DESCRIPTION

The Bowflag® Street Banner puts a twist on traditional street banners by combining street banner hardware with our Bowflag® to form an eye-catching display. It is constructed of fiberglass poles, 40" steel bands, and pole holder brackets. The adjustable hardware allows this flex banner to fit nearly any pole and to be positioned at multiple angles. This flag display features a print that measures 2'x7'. It is finished with a printed pole sleeve instead of black poly-stretch header tape for maximum advertising space and a reinforced pole tip for strength. Your client can assemble this flagpole easily in a matter of minutes. The Bowflag® Street Banner can be used indoors and outdoors to decorate for the holidays or to advertise a new shop along the boardwalk.
