

BOWFLAG® PREMIUM Surfer

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for indoor or outdoor use.

DESCRIPTION

The Bowflag® Premium Surfer is a flag display with a sturdy frame constructed of aviation-grade fiberglass and steel poles. Available in three sizes, this flagpole reaches a maximum of 18' tall. The surfer shape of the display allows the print to remain visible at all times with no wind necessary. It is finished with printed pole sleeves in place of black poly-stretch header tape to maximize advertising space. No tools are necessary to set up this flagpole. The included economy bag can be used to store your client's display while traveling. We also offer an optional carrying case with handles and individual pockets for easier transport. The Bowflag® Premium Surfer is ideal for in-ground outdoor use to promote a championship game or to identify the registration booth for a marathon.
