

PORTABLE FLAGPOLE with Banner Arm

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for use indoors or outdoors.

DESCRIPTION

The Portable Flagpole is a simple flagpole with the benefits of a portable display. This flagpole features a banner arm so wind is not necessary to keep the custom print visible at all times. The custom print is finished with pole sleeves as well as a cut out corner, and is available in single-reverse and double-sided layouts. Because of the flexibility of this flagpole, it has a much wider range of uses than traditional flagpoles. Instead of being mounted in one location, the Portable Flagpole can be constructed in minutes and used indoors or outdoors. Use the included economy bag or optional carrying case to make transport easier. Support the home team while tailgating or use as company branding at the corporate picnic.
