

T-POLE® BASIC Double Arm

Technical Specifications | R1.050613

DESCRIPTION

The T-Pole® Basic Double Arm from Tex Visions is constructed of two aluminum banner arms as well as a height-adjustable aluminum pole that can reach three heights up to almost 18'. This flagpole features two custom prints, so your client can display either a different image on each print or the same image on both prints for more exposure. The telescopic pole uses spring buttons to lock it at one of the three desired heights, allowing this flagpole to be assembled easily in minutes. In addition to being user-friendly, this flag display is highly portable with an included carrying case to allow for storage. Use the T-Pole® Basic Double Arm indoors and outdoors to promote an upcoming show at a local theater or to direct traffic to employee and visitor parking.
