

T-POLE® BASIC Parallel Arm

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for use indoors or outdoors.

DESCRIPTION

The T-Pole® Basic Parallel Arm is a height-adjustable flagpole constructed of aluminum hardware, including four banner arms and a telescopic pole that stands at three heights with the maximum at almost 18'. Unlike the Double Arm model, which mounts the banner arms in a line to form a T shape, the banner arms are parallel to each other to create a unique double-sided display. Your client is able to show either two different images or the same image on both sides. Because they are mounted back to back, prints are available in single-reverse only. Assembly is a simple process that can be completed in just a few minutes. Pack the telescopic flagpole into the included carrying case to keep it secure while traveling. Use it indoors and outdoors to advertise that a restaurant now delivers or to greet visitors to a company's corporate office.

PRODUCT SPECIFICATIONS

NAME	T-Pole® Basic Parallel Arm
PART NO.	#H_TP00161
WEIGHT	18.0lb
