

T-POLE® BASIC Triple Arm

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for use indoors or outdoors.

DESCRIPTION

The T-Pole® Basic Triple Arm from Tex Visions is a telescopic flagpole constructed of six aluminum banner arms and an aluminum pole that adjusts to three heights up to around 18'. It also has three single-reverse or double-sided custom prints, allowing your client to display up to six different images. Setting up this tripod-like flagpole is effortless and can be done in several minutes using the spring buttons to lock the pole into the desired height. Use the included carrying case to store the flagpole's hardware securely for transport and travel. Because the display features banner arms, your client can use this flagpole just as effectively indoors as it is outdoors. The T-Pole® Basic Triple Arm can be used to mark the finish line of a race or to draw passing traffic to a small business.
